

Extractor Fans

Silence, style and simplicity. Condensation and mould are not new phenomena and the need to safeguard dwellings against them has not diminished. In fact, with improved heating systems, insulation and double glazing, homes are becoming more and more sealed, however, homes need air to 'breathe' and that air needs to be of good quality. Zehnder offers a choice of wall and ceiling extraction fans to blend with indoor decors which also incorporate uniquely quiet and low consumption options for the ultimate solution in single point ventilation.

1

Energy efficiency

The ZSR100 costs under half a penny a day to operate; between 0.025p (9 minute usage) and 0.42p (2.5 hour usage) depending on the over-run timer setting. In addition to this, it only consumes 13 Watts of energy per hour.

20 Watts

13 Watts

2

Health

Airborne particles are always floating around our homes, including those found in man-made furnishings and cleaning products plus moisture is continually created through bathing and washing. Zehnder extract fans have been designed to eliminate condensation and improve the general air quality within the home by extracting stale air from the wet rooms where many of the major pollutants can build up. Using extract fans helps to provide a comfortable environment within the home by improving the indoor air quality.

3

Silence

A major concern for home owners is the level of noise produced from standard ventilation, particularly in the bathroom where relaxation and a sanctuary atmosphere is so important. Taking account of this, Zehnder offers a range of 'Silent' fans operating at typically 70% less noise than standard bathroom fans; the ZSR100 fan is 26 dB (A).

Leaves Rustling
10 dB (A)

Whispering
20 dB (A)

Talking
40 - 60 dB (A)

4

Style

Inspired by modern trends and a popular desire for matching accessories, Zehnder decorative fans use materials, finishes and shapes that blend stylishly with surrounding decor. The range of fans has been created to complement current bathroom and kitchen design, comprising models that incorporate lighting, high quality materials, discreet low profile designs and decorative front covers with a choice of easy to change, central inserts, transforming ventilation into a design feature.

5

Simplicity

Zehnder extraction fans are simple to fit, control and maintain, providing the perfect solution for refurbishment projects where central systems can be difficult to install. Zehnder offers a comprehensive range of accessories to suit both wall and ceiling applications.
